APPLICATION FOR PERMIT UNDER POLLUTION CONTROL ACT, 1967 (Effluent)

Preamble—The Regional District of Nanaimo is planning to collect wastewaters from the Village of Parksville, the Village of Qualicum Beach, as well as some unorganized territory, and bring the waste to a Pollution Control Centre near French Creek. The Pollution Control Centre will provide a high degree of biological treatment and effluent disinfection. It is proposed to discharge the treated effluent through a long ocean outfall located off the mouth of French Creek in deep water in the Strait of Georgia.

The location for the outfall has been selected after extensive oceanographic studies established that this was the best location available in School District No. 69. The proposed outfall would be the only regional wastewater disposal facility in School District No. 69, and all future development would be connected to the biological treatment plant near French Creek.

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (2) of the *Pollution Control Act, 1967* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

The Regional District of Nanaimo, of 6300 Hammond Bay Road, Box 40, Lantzville, B.C. V0R 2H0, hereby applies to the Director for a permit to discharge effluent from a municipal sanitary sewer system located in the Qualicum-French Creek-Parksville area of School District No. 69 into the Strait of Georgia, and gives notice of application to all persons affected.

The land upon which the works are located is Lot 2, Sub. of part of Lot 28, Plan 2570, except east 4/5/10 chains of Parcel A (DD 5360N) of Lot 4, of Lot 28, Plan 2570, Nanoose Land District.

The discharge will be located in the Strait of Georgia about 8,000 feet offshore from the mouth of French Creek, at a depth of about 200 feet below low water.

The quantity of effluent to be discharged is as follows: Average annual daily dis-

charge (based on operating period), 1,440,000 imperial gallons. Maximum daily discharge, 3,500,000 imperial gallons.

The operating period during which the effluent will be discharged is continuous.

The characteristics of the effluent discharged shall be equivalent to or better than total suspended solids, 60 mg/l, total solids, 320 mg/l; 5-day (20°C) BOD, 45 mg/l; and faecal coliform, mpn/100 ml, log mean 200.

The type of treatment to be applied to the effluent before discharge is comminution, grit removal, activated sludge treatment, effluent disinfection, waste sludge digestion, and digested waste sludge drying beds.

This application, dated on the 26th day of May 1975, was posted on the ground in accordance with the Pollution Control Regulations.
